

The SensAble™ Dental Lab System — Fabrication

MAXIMIZE YOUR INVESTMENT

Only one CAD/CAM solution offers you so many capabilities from a single, integrated system. Use the same system to scan, design, and fabricate removable & fixed restorations, including partial frameworks, copings and substructures, and full contour crowns and bridges.

A full plate of resin patterns from the integrated 3D printer can produce 10 partials and 80 crown and bridge units in one print run.

INVEST WISELY – CHOOSE SENSABLE

Only one company is fully committed to your success, from installation through fabrication. Find out why so many labs are choosing the SensAble Dental Lab System. It's the smart choice for smart dental labs.

USE RESIN PATTERNS TO:

- Cast metal
- Press porcelain
- Inject Valplast®
