PARTIAL FRAMEWORK DESIGN

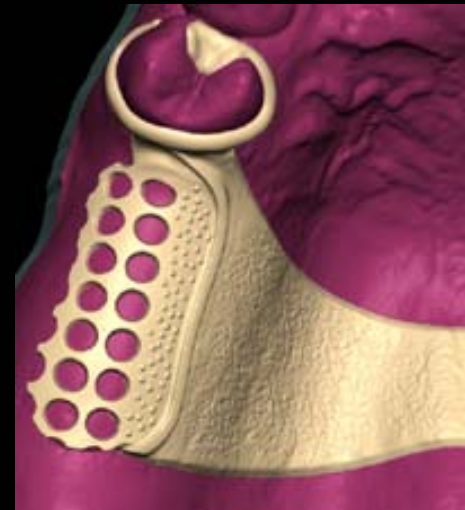

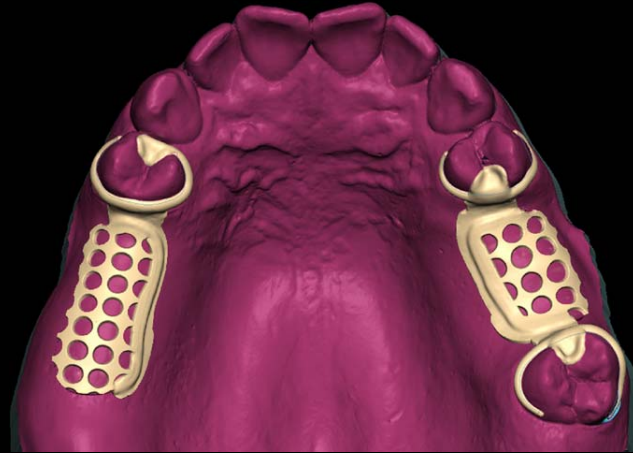

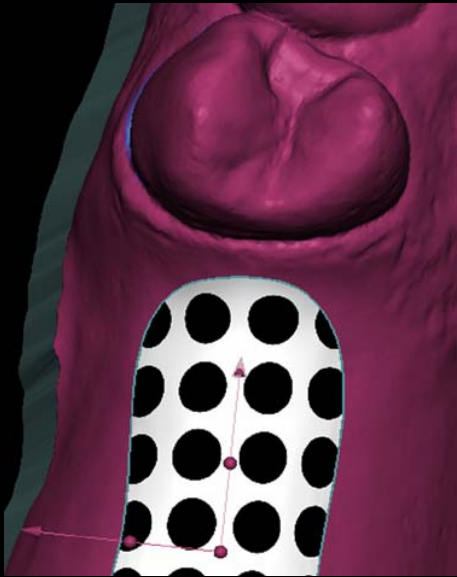

PARTIAL FRAMEWORK DESIGN

Survey model to expose and
block out undercuts

PARTIAL FRAMEWORK DESIGN

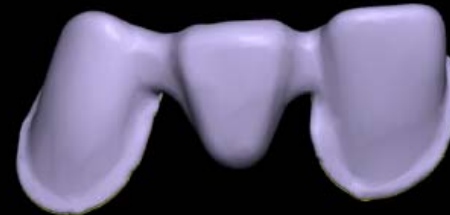

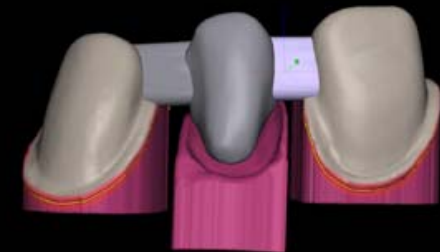

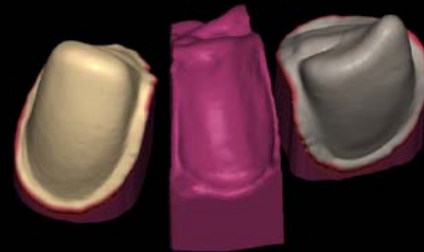

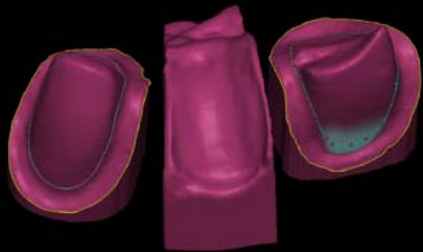

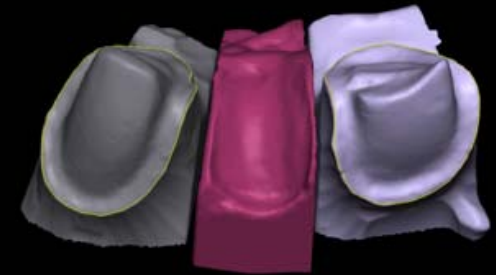

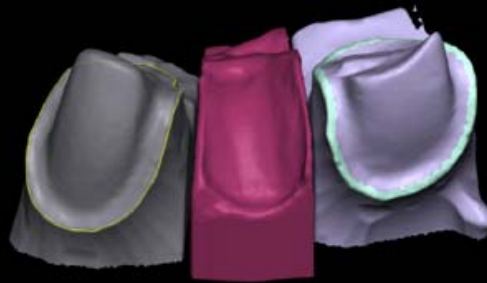

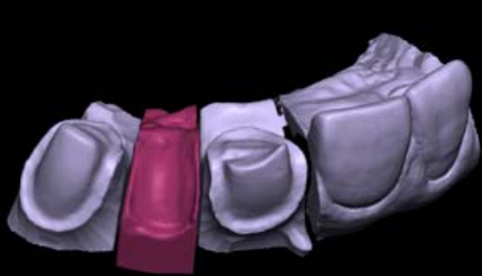

Work with digital wax just like real wax

PARTIAL FRAMEWORK DESIGN

Final digital wax-up ready for 3D print

CROWN & BRIDGE DESIGN

KEY BENEFITS

Fast and easy to learn
using sense of touch

Increase productivity of
experienced lab technicians

Facilitate hiring and training
new lab technicians

KEY BENEFITS

Produce multiple types of restorations, all in one system

Maintain design control;
deliver consistent quality
and fast turn-around

Reduce adjustments
and re-makes

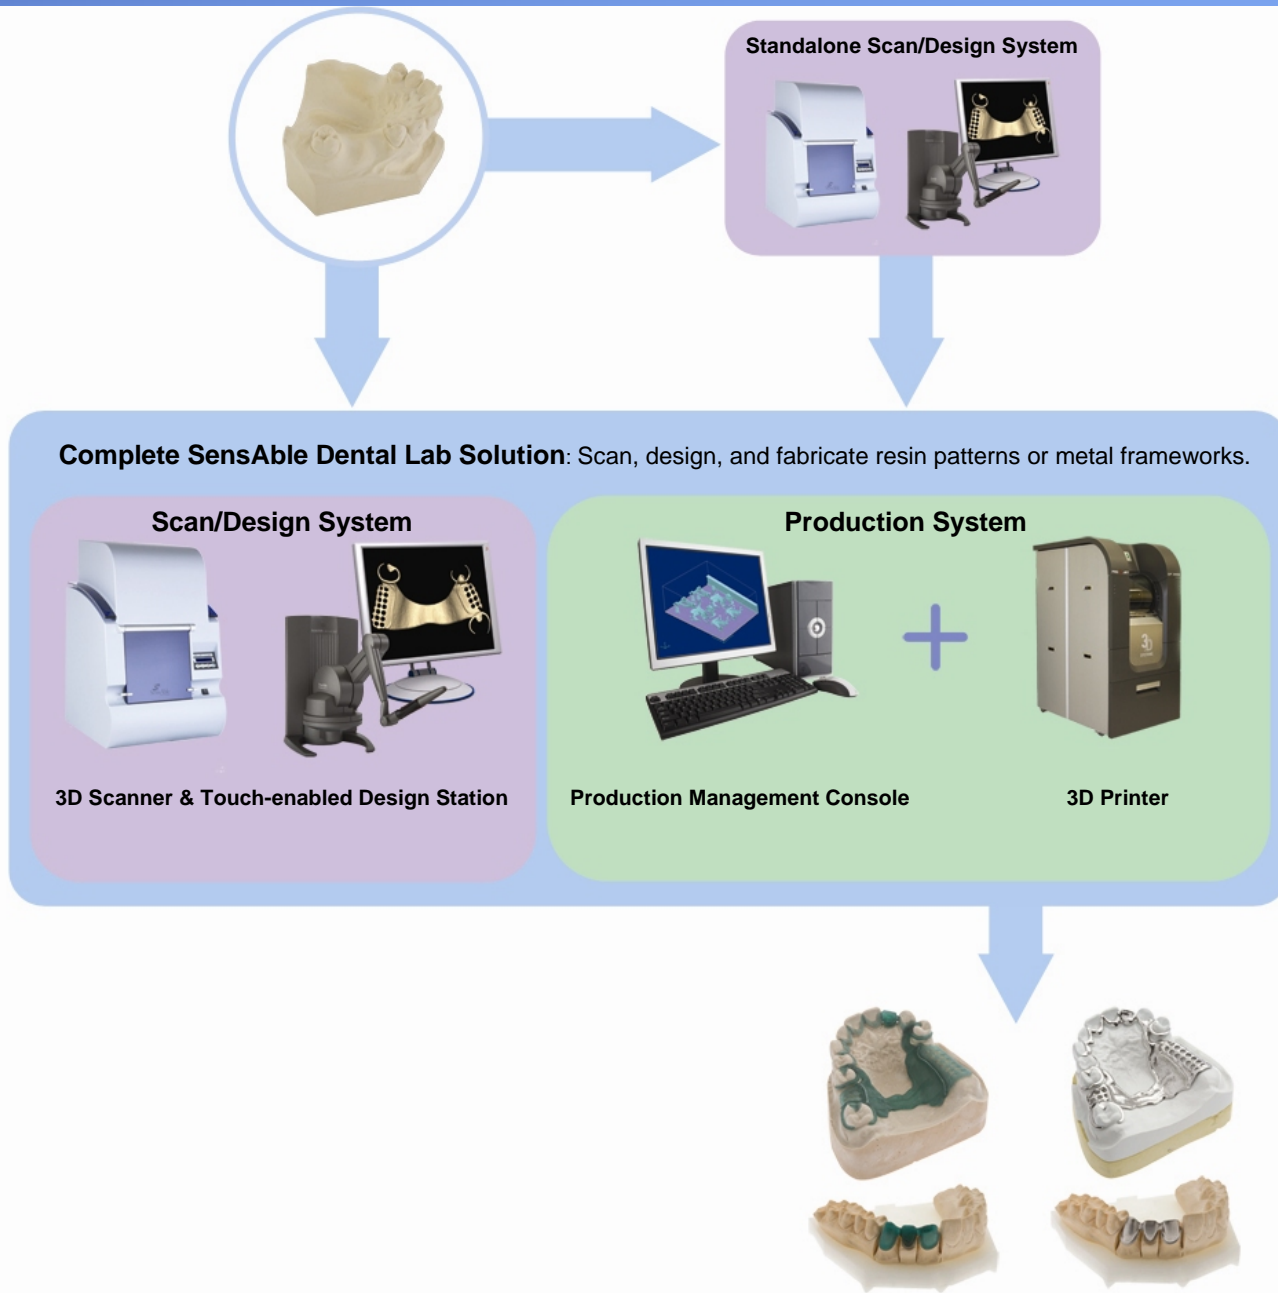

TOTAL SOLUTION

VERSATILE

FLEXIBLE BUSINESS MODELS

SensAble Authorized Production Center

SensAble Authorized Training Center

WIRONIUM® plus

What Dental Industry Leaders are Saying

"I've been creating high-end partials for over 20 years and training others to create them. During the last couple of years I've watched digital innovations emerge for other types of restorations, and wished I could implement them for RPD's. SensAble's Dental Lab System allows you to design RPD's in 3D, comparable to those designed in a traditional manner. I see great potential for this system in the years to come."

Martin Schmid CDT, Technical Consultant
BEGO USA

What Dental Industry Leaders are Saying

“BEGO USA is excited to partner with SensAble to provide hand-on training courses for SensAble's new Dental Lab System for producing partials and crown and bridge substructures. Dentists and labs want to know that moving to digital production won't affect the quality and the materials they have come to trust. We have been impressed by SensAble's commitment to understanding and integrating our materials into their process.”

Bill Oremus, General Manager
BEGO USA

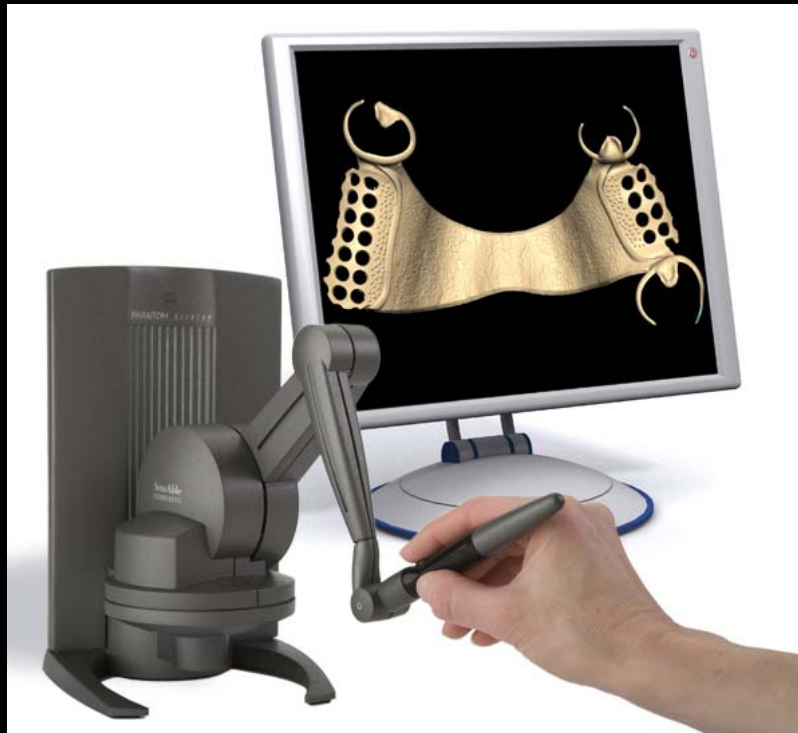

What Dental Industry Leaders are Saying

“When I first saw the SensAble Dental System, I couldn't believe how easy it was to create partial frameworks. SensAble is allowing the dental technician to maintain the 'artistry' in their work, while gaining all the benefits of digital technology. And, by helping SensAble understand the properties of our investment and casting materials, we can ensure that dental labs will be able to get the precise fit they need -- from digital scan to final casting. In fact, we were so excited by the system, we have signed on to become an Authorized Production Center.”

Devon Howe, President and CEO
Nobilium/Ticonium
A Unit of CMP Industries, LLC.
